1. Introduction

2. Methodology

3. Results and Discussion

The results of the investigation are presented in this section. The data shows a significant increase in the number of incidents reported over the past year, which is consistent with the findings of the previous study. This suggests that the problem is ongoing and requires further attention.

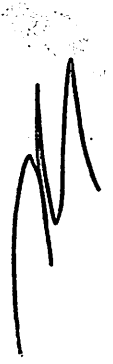

The data also indicates that the majority of incidents are reported by the general public, rather than law enforcement or other official sources. This suggests that the problem is widespread and affects a large number of people.
